AMER Add. Spend & Programme Performance

OPERATE CARRIES THE PROGRAMME

Operate is 23% of AMER's addressable spend but 72% of programme spend (14.6% capture). Build is 47% of spend with only 0.2% on programme

THE US IS MATURE AND CONTESTED

The US holds the largest pool, but entrenched GPO competitors and FDD language that blocks auto-enrolment cap growth, even with more OHES effort

SMALL OWNERS ARE THE ENGINE

First-time and small-scaling owners are 74% of the estate; OHES lifted their F&B participation by 24% and 14%. Mexico and LAC remain under-covered

Source: F2F PLT August Fact Pack v1.0 (31 July 2026), pp. 29–30, 44; dim_hotel extract (2025 programme spend, modelled addressable spend); AMER F2F regional input, Aug 2026, slides 20–24. CRF collected: 2025 actual per AMER 2030 opportunity slide.

Regional Strategy Overview | AMER

Regional Acceleration

Priorities

- #1 US CMH estate (Operate: F&B / OS&E) – lift utilisation and compliance
- #2 US pipeline and renovations (Build / Open: FF&E / EME) – win earlier in the lifecycle
- #3 Mexico and priority LAC markets – selective expansion where coverage and distribution are viable
- Ambition: +\$546m programme capture by 2030 (4.6% → ~7% share)

Approach

- Locked order guides beyond HIEX; P2P and utilisation reporting
- Compress FF&E design-to-delivery from 19 to 9.5 months; transform the waiver process
- Activate EME (energy, renewables, engineering) – \$163m by 2030
- Localise programmes, standards and distribution for Mexico / LAC; high-touch Premium and L&L offer

Budget & Dependencies

- 2026 CRF budget \$21.0m; 2025 collected \$21.7m (2.4% yield)
- Accelerate adds ~\$13.1m CRF a year by 2030
- Needs design, waiver and category capacity; in-market sourcing and OHES for Mexico
- Risk: \$2.1m revenue shortfall YTD (distributor payments, outstanding H1 supplier data)

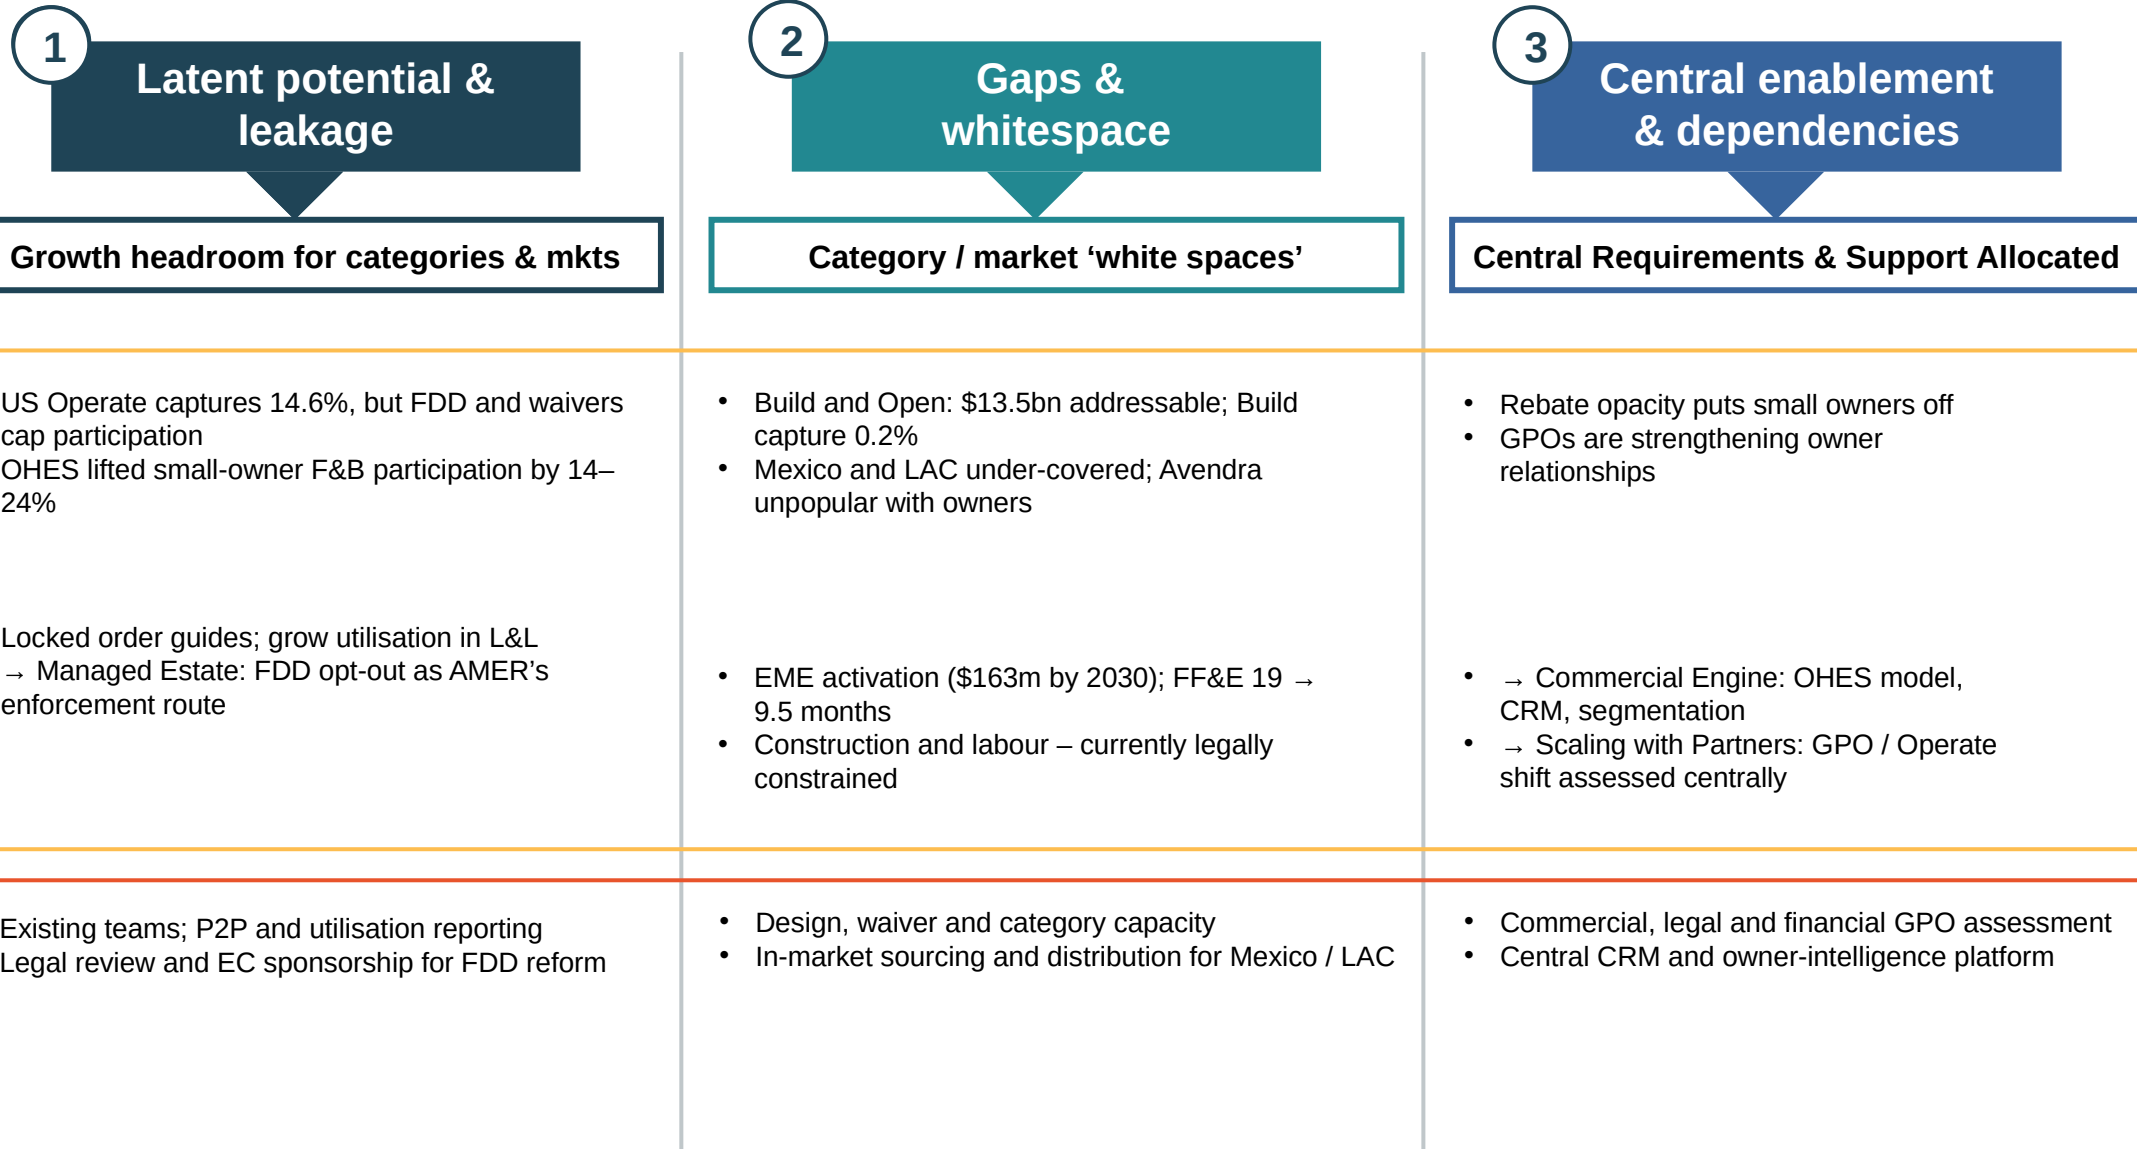

Support for Central Enablement

- → Managed Estate: FDD reform to auto-enrolment / opt-out as AMER's enforcement lever
- → Commercial Engine: expand OHES from a US capability into the global owner-lifecycle model
- → Scaling with Partners: evaluate a GPO / distribution model for Operate
- → PaaS: differentiated offer for Premium, L&L and pre-opening needs

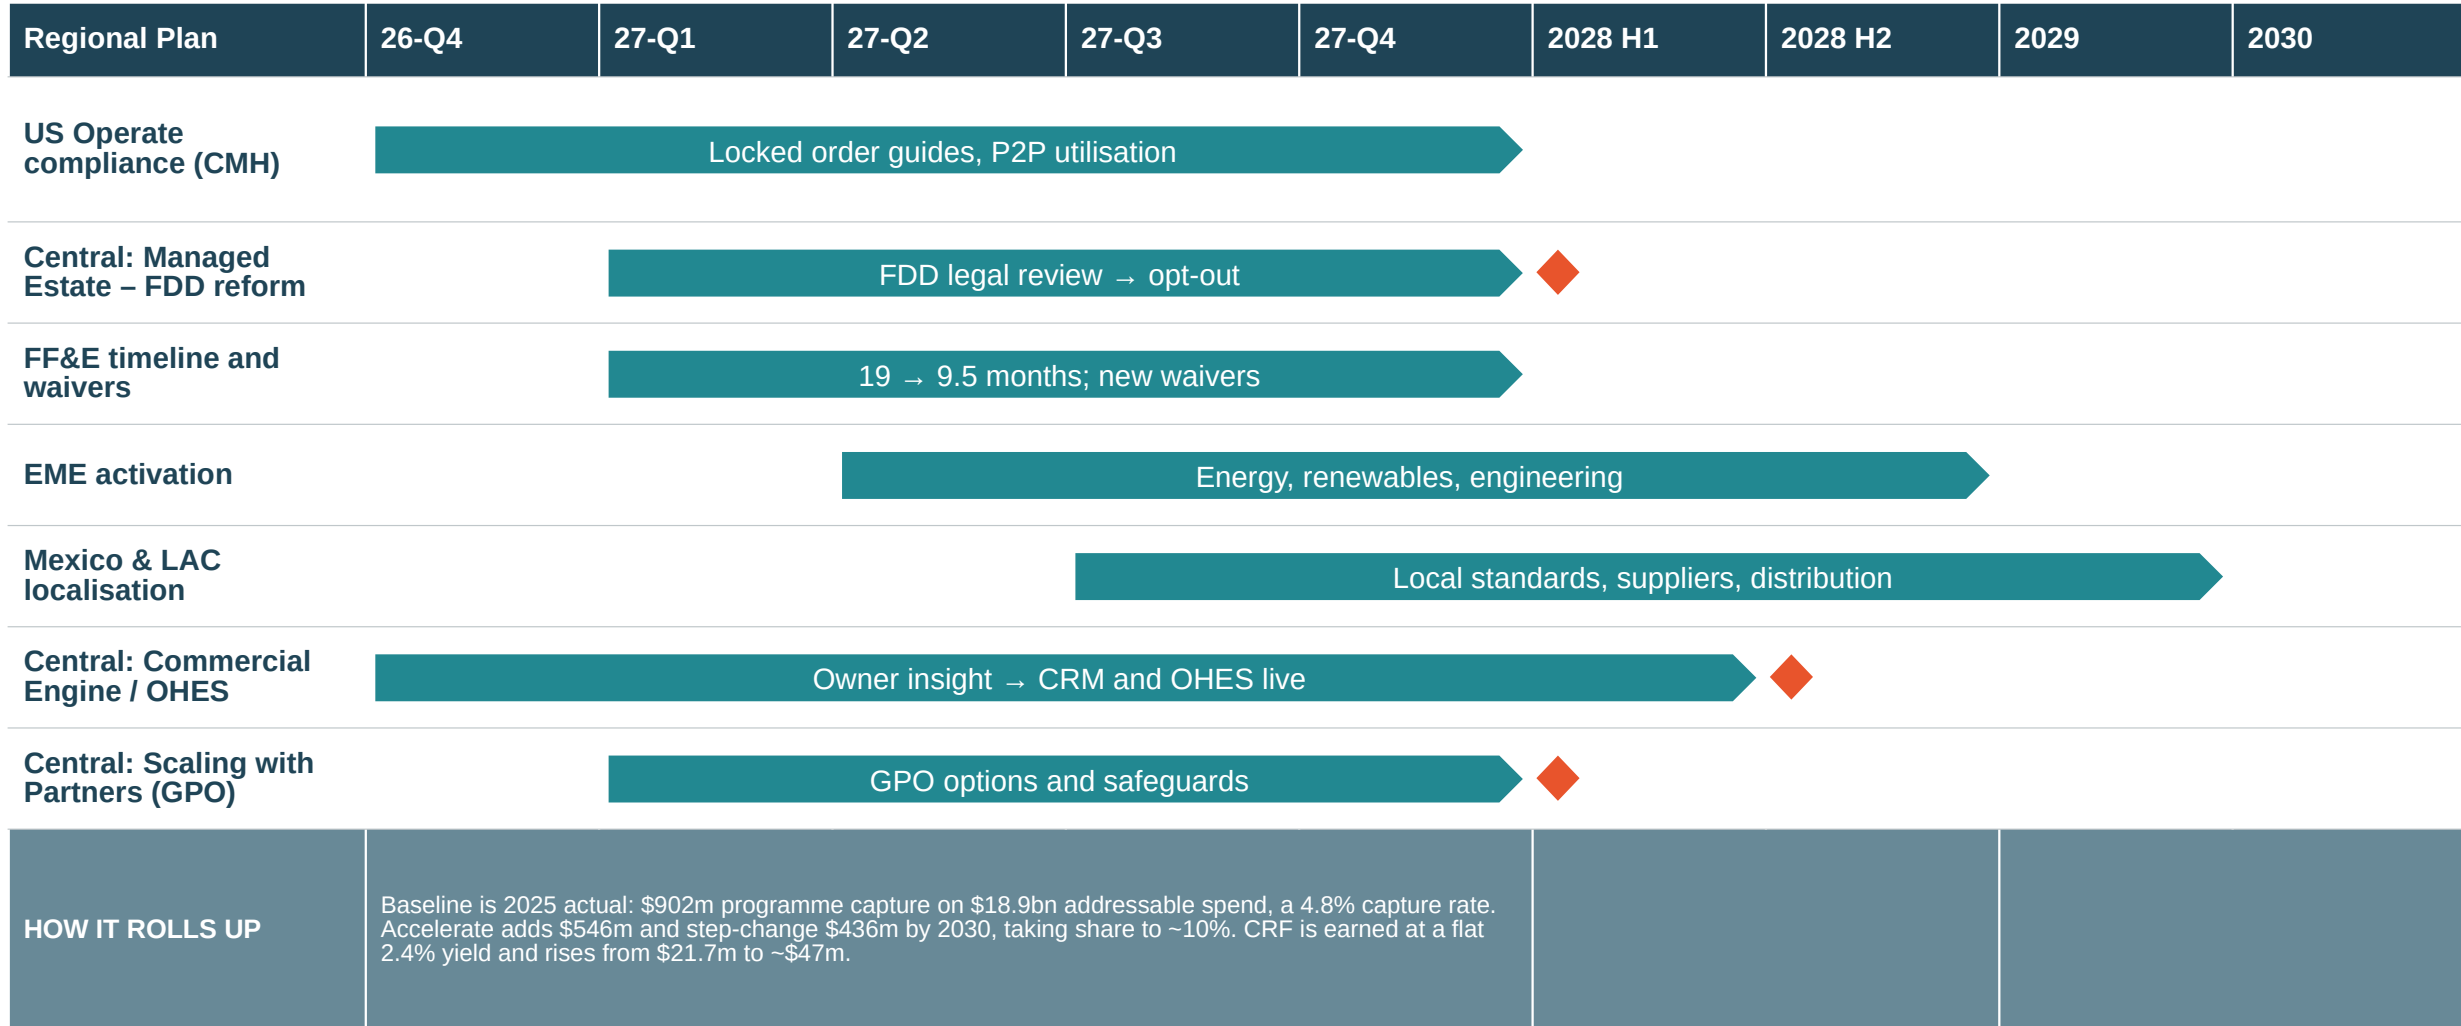

- Test FDD mandatory / opt-out language with Legal; locked order guides as the control
- Offer the FTO / small-scaling OHES playbook as the central segmentation template
- Assess GPO options inside the central partner framework – protect owner data, control and economics

- Step-change adds \$436m capture and ~\$10.5m CRF by 2030 (→ ~10% share)
- EC sponsorship and legal review for FDD reform
- Commercial, legal and financial assessment of GPO choices
- Central CRM, owner segmentation and utilisation insight

Proposed approach | AMER

EMEAA Add. Spend & Programme Performance

BUILD IS THE REAL GAP

Build is 48% of EMEAA's addressable spend but only 0.3% runs on programme. Operate, at 27% of spend, is where we already capture most (9.2%)

OUR GROWTH IS SHIFTING EAST

On IHG pipeline-vs-base growth, India leads the estate with Thailand/Vietnam (and KSA — all best won at signing)

SCALE IS CONSOLIDATING AGAINST US

Entegra acquired Prestige Purchasing UK (April 2026) and three conglomerates now control 25% of GPO spend — it hit our most mature market first, and their scale challenges the value we offer owners

Source: F2F PLT August Fact Pack v1.0 (31 July 2026), pp. 10, 19, 28–30, 32, 36, 45–47; dim_hotel extract (2025 programme spend). CRF collected: 2025 actual per EMEAA 2030 opportunity slide (template showed \$2m — to confirm).

Regional Strategy Overview | EMEAA

Regional Acceleration

Priorities

- KSA & IMEA (Build, FF&E, Operate): 1% of £0.92bn captured; largest pipeline
- SE Asia (Operate, F&B): 60% P2P coverage, managed-heavy – lowest friction
- India (Build, Open, Operate): high-growth pipeline, little programme presence
- UK&I / N. Europe: £1.47bn addressable, 92% franchised, <4% P2P

Approach

- Procurement at HMA / franchise signing (KSA, SE Asia, India first) – Build capture 0.3% → ~4%
- Convert SE Asia P2P coverage into spend; open long-tail categories
- Develop local suppliers and Build pipeline visibility in India
- UK&I: deploy P2P and a franchise value proposition worth joining

Budget & Dependencies

- 2026 CRF budget \$4.7m; 2025 collected \$3.5m (2.1% yield)
- Accelerate: +\$365m capture and +\$7.8m CRF by 2030
- KSA headcount or third-party coverage (KSA contractor \$0.3m in 2026)
- UK&I P2P needs a business case; FutureLog contingency required

Support for Central Enablement

- → Managed Estate: pilot region (EAPAC, IMEA) – 37% of hotels, £1.21bn addressable
- → Commercial Engine: regional owner engagement and CRM; kill the 3% myth
- → Scaling with Partners: EMEAA as the GPO test case
- → ESM: fewer, deeper contracts ahead of the 27–28 renewals

- Run the central mandate pilot from Q2 27 with GM / DoO accountability and ManCo commitments
- Key-account coverage for institutional and sovereign-backed owners
- Restate the GPO case before scoping; Northern Europe the likely fit
- Move suppliers from compliance to growth partners

- Step-change: +\$92m capture and +\$2.0m CRF by 2030 (→ 9% share)
- M&A, commercial and legal diligence – external support
- Central CRM plus regional engagement leads
- Supplier golden record before consolidation benefits land

Proposed approach | EMEAA

1 Latent potential & leakage Growth headroom for categories & mkts	2 Gaps & whitespace Category / market 'white spaces'	3 Central enablement & dependencies Central Requirements & Support Allocated
Opportunities & initiatives • Build is 48% of spend but only 0.3% runs on programme • Managed estate: 37% of hotels, the lowest-friction channel • Win Build at signing: \$143m by 2030 • → Managed Estate: mandate pilot in EAPAC / IMEA (\$38m)	• Many category / market combinations under-served • UK&I is 92% franchised with <4% P2P • Close white space: \$53m by 2030, weighted to higher-CRF non-F&B • India local supply base; SE Asia long tail	• The 3% CRF myth is being spread by a GPO • Entegra / Prestige consolidation; FutureLog dependency • → Commercial Engine: key accounts, CRM, collateral (\$38m) • → Scaling with Partners (\$92m); → ESM consolidation (\$31m)
Costs, investment & resource allocation • Headcount or third-party coverage for KSA • Existing teams for the mandate; ManCo negotiation	• Sourcing capacity for coverage mapping (H1 27) • UK&I P2P business case	• External M&A and legal diligence • Supplier golden record; central CRM

SEQUENCING & DEPENDENCIES | EMEAA

Regional Plan	26-Q4	27-Q1	27-Q2	27-Q3	27-Q4	2028 H1	2028 H2	2029	2030
Win Build at signing		KSA, SE Asia, India, then Europe and Japan							
Central: Managed Estate pilot		Model Q1 → EAPAC / IMEA pilot							
Close programme white space		Coverage map H1 27, then fill gaps							
Simplify & flex CRF	Kill the 3% myth								
Central: Commercial Engine		Owner CRM and key accounts							
Consolidate supply / ESM			27–28 renewal cycle						
Central: Scaling with Partners		GPO deal 2027, integrate from 2028							
HOW IT ROLLS UP	Baseline is 2025 actual: \$163.8m programme capture on \$5.46bn addressable spend, a 3.0% capture rate. Addressable spend grows to \$7.64bn by 2030 per the fact pack. CRF is earned at a flat 2.1% yield, while the target grows 3% a year to \$5.3m.

2.0% of CRF Prog Spend

GC Add. Spend & Programme Performance

CAPTURE IS HALF THE GLOBAL RATE

Only 2.0% of GC's \$4.6bn addressable spend runs on programme (global ~4%). Operate captures 3.7%, against 9.2% in EMEA and 14.6% in AMER

BUILD IS THE PRIZE, BUT ACCESS IS BLOCKED

Build is 47% of spend at 0.5% capture. We lack POPD pipeline access, and peers run lead-constructor programmes IHG legally can't

OWNERS BUY ON PRICE AND PERCEPTION

Owners see central programmes as dearer and CRF as a hidden cost (the '10% myth'); long-tail F&B and Operate spend stays off-programme

Source: F2F PLT August Fact Pack v1.0 (31 July 2026), pp. 29–30, 48 (p. 29 GC programme panel repeats EMEA's \$164m — corrected to \$93m per p. 30 and dim_hotel); GC F2F regional input, Aug 2026, slides 3–7. CRF collected: 2025 actual per GC 2030 opportunity slide.

Regional Strategy Overview | Greater China

Regional Acceleration

Priorities

- Standard products: drive OBSM adoption (CRF headroom \$0.08m)
- Lead constructors and digital solutions in Build (\$0.16m)
- Long-tail Operate products (\$0.11m) and F&B non-standard (\$0.45m)
- Develop a frozen-seafood supplier base

Approach

- P2P adoption across managed hotels, especially Essentials; AI-led spend classification
- Use POPD for proactive OHE and procurement checkpoints; attend kick-off meetings
- Aggregator partnerships for long tail; DDP delivery via NGSC logistics partners
- Partner with design consultants to optimise the supplier base

Budget & Dependencies

- 2026 CRF budget \$2.0m; 2025 collected \$1.9m
- Accelerate: +\$15–22m capture by 2030
- Needs OHE field resources, marketing packages and seafood market intelligence
- F&B non-standard needs distribution infrastructure that doesn't yet exist

Support for Central Enablement

- → Managed Estate: AI-enforced compliance controls; Touchpoint programme
- → Commercial Engine: POPD–CRM integration, KOM tracking, Owner Link
- → Scaling with Partners: lead-constructor legal review; retail programme
- → PaaS: propositions by owner type (SOE, repeat private, first-time private)

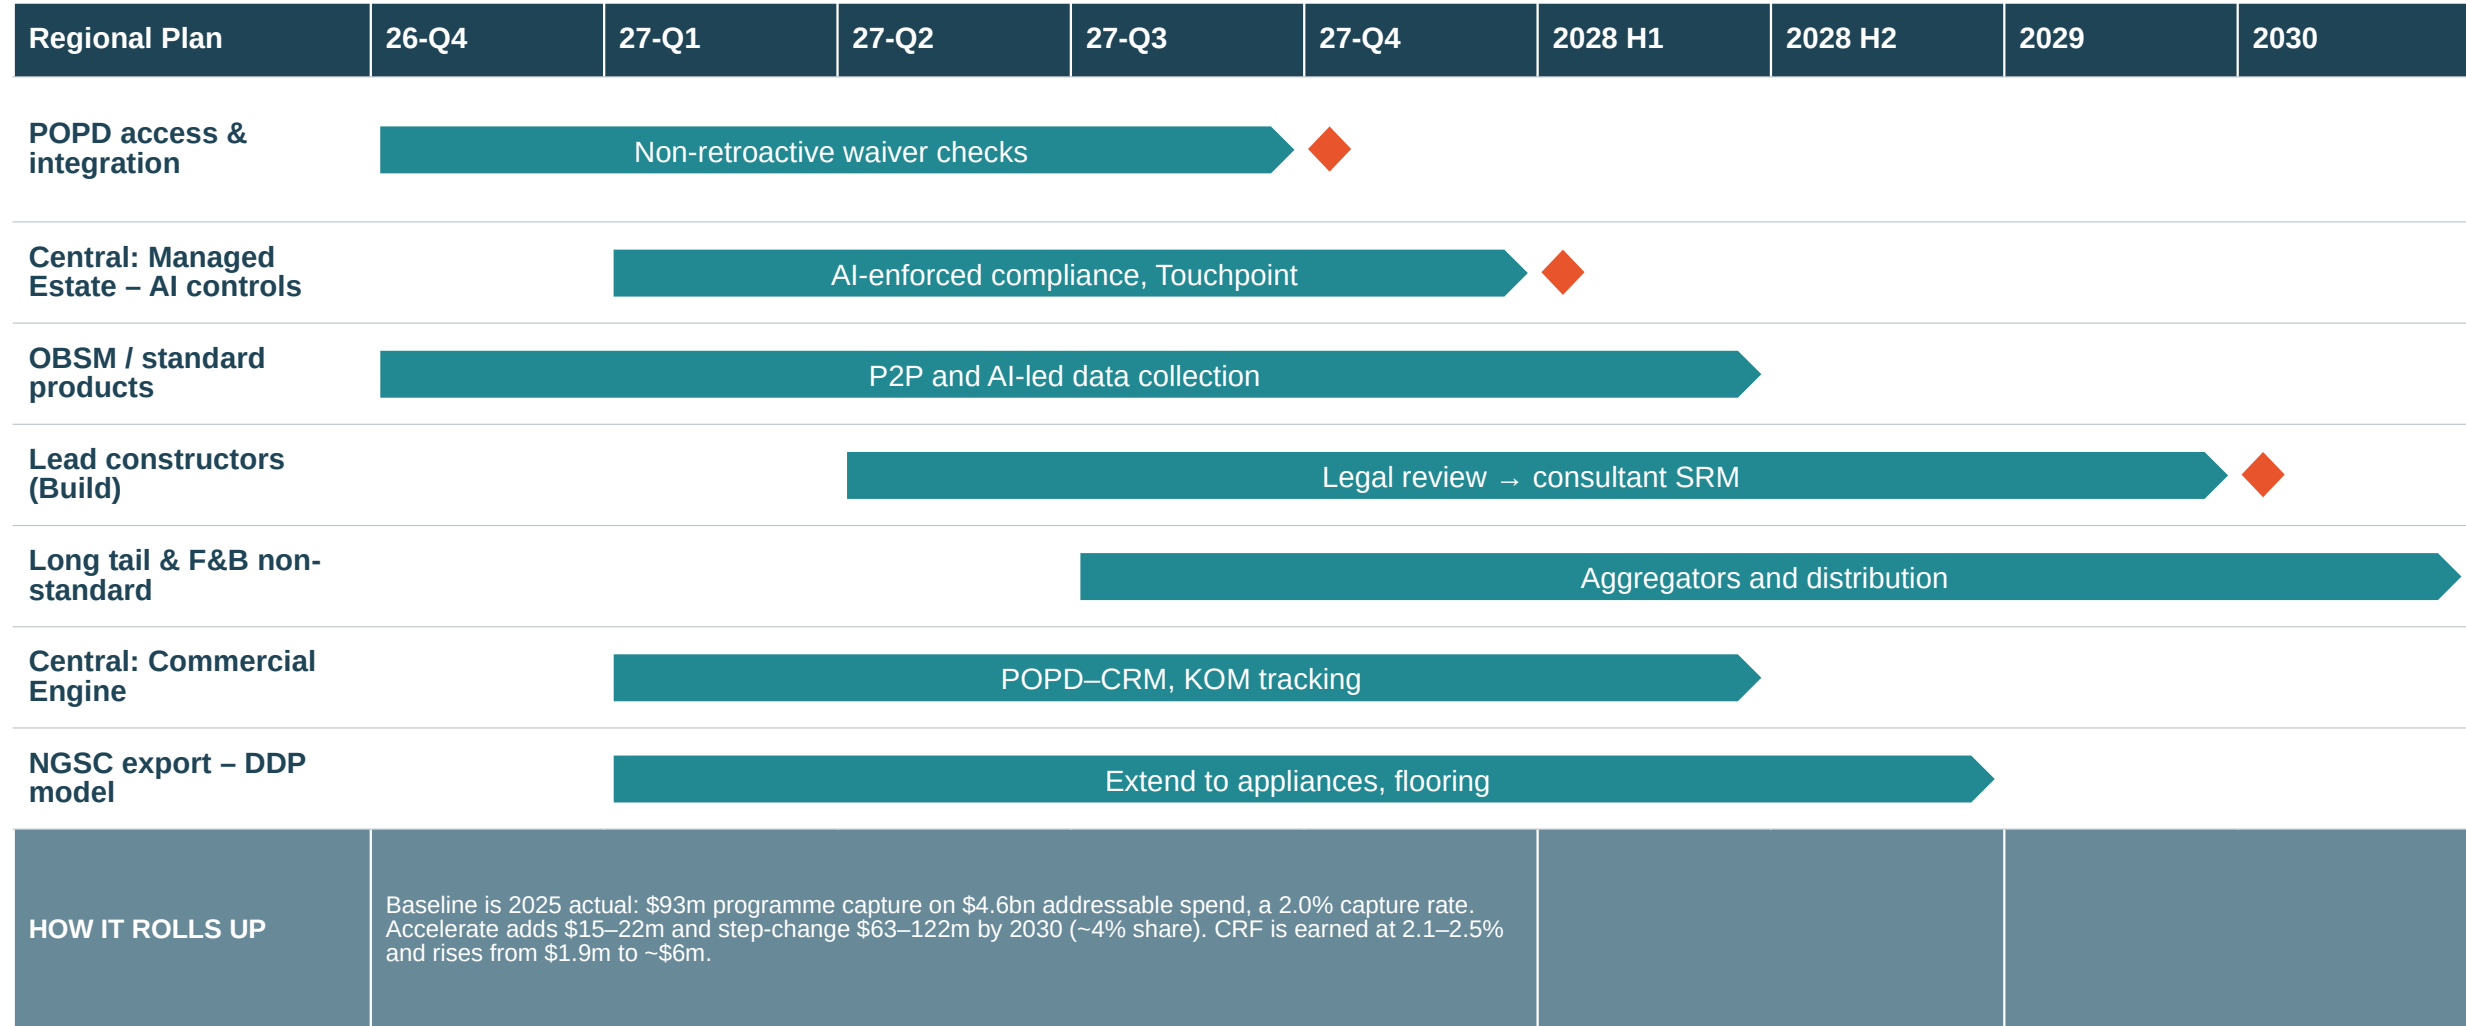

- Platform integrated with POPD for non-retroactive waiver checks – the single most critical unlock
- Owner and hotel incentives to drive participation and compliance
- Retire the '10% myth' with coordinated central collateral

- Step-change: +\$63–122m capture by 2030; combined CRF uplift \$1.95–3.6m
- BRR and Legal support for lead-constructor and retail programmes
- Digital and AI investment; HLG POPD access
- 2026 spend: P2P data analytics \$0.1m; Asia supply-chain legal study \$0.2m

Proposed approach | Greater China

1 Latent potential & leakage Growth headroom for categories & mkts	2 Gaps & whitespace Category / market 'white spaces'	3 Central enablement & dependencies Central Requirements & Support Allocated
Opportunities & initiatives • Operate capture only 3.7%; P2P coverage low in Essentials • No controls on hotels not adopting OBSM products • OBSM adoption via AI-led data collection: \$8–12m • → Managed Estate: Touchpoint and AI-enforced controls	• F&B non-standard / Operate general: \$900m addressable • Long tail (dry goods, spices, stationery) not covered • F&B non-standard \$45–90m; long tail \$10–20m via aggregators • NGSC export: DDP model; add appliances, flooring, sanitary ware	• No POPD access; procurement absent from kick-offs • Lead-constructor programmes legally constrained • → Commercial Engine: POPD–CRM integration, KOM tracking • → Scaling with Partners: lead-constructor review; retail
Costs, investment & resource allocation • P2P rollout and data analytics (in flight) • OLT promotion of the Touchpoint programme	• Digital distribution / aggregator solution • Market intelligence for frozen seafood	• BRR and Legal support • Digital / AI capability; OHE field resources
